

Your home, as new. It's that simple!

Renovation ahead? Are you decorating?

Or maybe you just need a change?

With Vilo products, you can change your place on your own: it is affordable, quick and easy. And the effect will be unique.

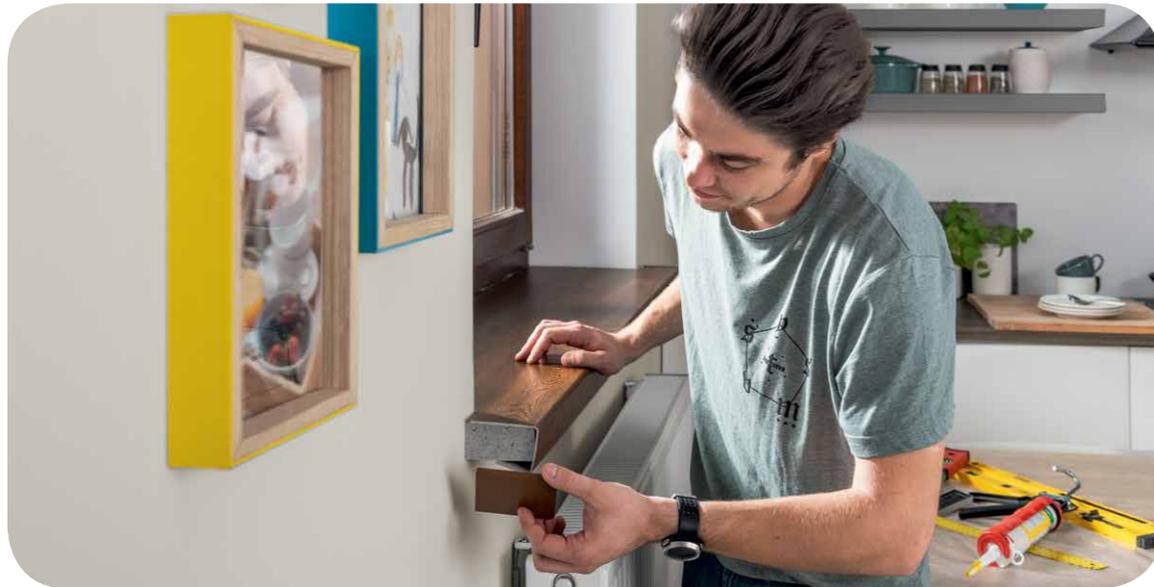

Start from the simplest things – mount new windowsills! They are aesthetic and durable. Easy to install and trouble-free to use. They will successfully help create a new look for your home.

Bet on the windowsill

Your windows are the most exposed element of every interior. That's why they need a good setting and finish. If you are looking for a quick and inexpensive solution bet on the Vilo windowsill. Installation is easy and effortless, without the need for specialist tools and with little disruption. It's easy to keep clean and is also light and durable.

It looks fantastic, and the robust nature of the product allows you to place anything from plant pots, to books and newspapers, to your morning mug of coffee on the windowsill. The colour selection allows you to match your windowsills to the rest of your interior.

Choose your best option

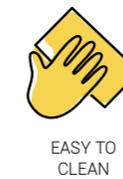

Vilo windowsills are an ideal solution in various situations: when you install your windowsill for the first time, when you want to replace the old with the new one, or when you need a quick change without removing the old windowsill. Where necessary, choose one of the Vilo products:

Chamber windowsill

Aesthetic and durable product, which you can easily install after removing the old windowsill.

Windowsill overlay

Interesting and simple solution, when it's hard to remove your windowsill and you must leave it.

Interior windowsills | Types

Chamber windowsills and windowsill overlays have the same functional properties. The only difference is their application.

When you install a windowsill for the first time or when you want to replace an existing one, choose the chamber version. Use an overlay to mask a damaged windowsill that is difficult to remove. Simply glue it on and you're done!

Chamber windowsill

Cover cap

Windowsill overlay

Cover cap

To finish off the windowsill in an aesthetic way, you need end caps. Match their shade to the colour of the windowsill – your choices include: White (for White and Marble), Golden Oak, Nut and Winchester.

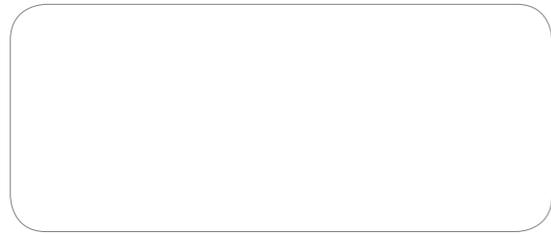

Vilo windowsills and windowsill overlays come in various widths and lengths. You will find them in DIY stores, sold in sets with end caps. Windowsills with a length of 6 m are available on request. All variants are presented in the table on page 10. Have a look there and get acquainted with the full offer.

Interior windowsills | Colours

Windowsills and windowsill overlays are available in the same colour schemes.

Depending on the character of your interior, choose a universal white or marble pattern or one of the shades inspired by natural wood grain. You can also match the colour of the windowsill to the colour of the window frame and create a perfectly harmonious duet. And if you follow trends and have the courage to be an interior designer, opt for contrast. The choice is yours.

White

Marble

Winchester

Golden Oak

Nut

See how many possibilities you have:

Windowsills | Installation instructions

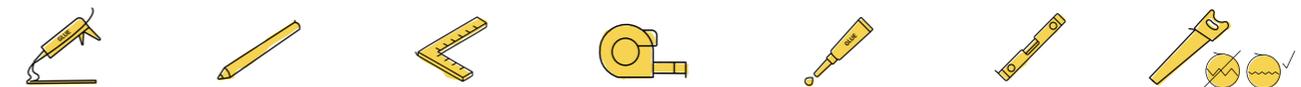

Have you already selected the right internal windowsill? Now, you can just install it. You will obtain the effect in no time. It's really easy!

Chamber windowsill

1. Before installing, store the windowsill for at least 5 hours in a room with 20°C temperature.
2. Measure the window niche in which you intend to install the windowsill.
3. Cut the windowsill to desired dimensions with a fine-toothed saw.
4. Stick on the cover cups at windowsill ends using a quick contact glue.
5. Remove dust from the surface and apply assembly adhesive.
6. Fit the windowsill into the window niche.
7. Level the windowsill during installation.
8. Remove protective film from the windowsill surface. And it's ready!
9. Use silicone to fill the gap between the windowsill and the wall.

Windowsill overlay

1. Before installing, store the overlay for at least 5 hours in a room with 20°C temperature.
2. Measure the window niche in which you intend to install the overlay.
3. Cut the overlay to desired dimensions with a fine-toothed saw.
4. Remove dust from the surface and apply assembly adhesive.
5. Put the overlay on the old windowsill.
6. Remove protective film from the overlay surface.
7. Secure the cover caps using a quick contact glue. And it's ready!
8. Use silicone to fill the gap between the windowsill and the wall.

Have doubts?
